Install missing content and scripts

First of all go to your San Andreas Steam folder, by default is here:

```
\\192.168.1.100\steam\steam\content\North\usa\sa\stamps
```

where % represents your drive name, and % your folder structure.

Make a backup before replacing files or you will have to download the entire game again.
This is how game base folder. Here we're going to install the exe loader open steam, we have 2 zip and unzip the script folder, and the 2 zip into the game base folder. Replace the existing one.

We need to do the same with modloader zip. We unzip the modloader folder and the modloader into the game base folder.
We also need GTA SA Old Audio 72. Just unzip it too into game base folder and replace the files to get all new songs back.

From GTA San Andreas Fixed PS2 zip we only need the data folder inside it, so unzip it into game base folder and replace the files. This restores the missing objects in Las Venturas, and fixes many map bugs.

We're done with the overwrite, now go into scripts folder.
into scripts folder just unzip SteepPatchSA.exe and SteepPatchSA.exe from steeppatch_11_beta.zip
same goes for limit_editor_gta3x.zip, vehlights.rar, GTADA_widescreen, SA.zip and correct.zip, we only need the .dat and the .exe into the scripts folder.

With poppye.zip we only need poppye.exe and poppye.dat, we don't need steam.exe
And from wdtips.rar we only need the wdtips.exe, the folder1.txt is outdated, the other one I gave you is better.

Now we have all scripts into scripts folder, how we start with the mods and the fixes.

Install mods and fixes

We need to come back to the game base folder and the go into modloader folder.
Now, we're going to create the following folders inside the modloader one:

fences, gym, map, radar, vegetation, vehicles, weapon and world.
Go into the new world folder, and into it create 2 new folders, data and models.
into data folder place the fonts.dat from SA_MobileFontsAllowed.rar, the poppye.dat from steam_patch_traffic.rar and the limedecy.dat

into models place the fonts.txt from SA_MobileFontsAllowed.rar, the fonten1.txt from SA_RemasteredFontEN1.rar, the font.txt from GTA SA Mobile to PC - iOS Radar Icons and the vehicle.txt from GTA SA Mobile to PC - Android Vehicle Details.rar

Go back to modloader folder.
Extract all .dat from GTA SA Mobile to PC - Fences.rar into fences folder.
Extract all .dat from Android Gym Equipment.zip into gym folder.
Extract all .dat from GTA SA Mobile to PC - iOS Radar Icons.rar into radar folder.
Extract all .dat from GTA SA Mobile to PC - Android Vegetation.rar into vegetation folder.
Extract all .dat and .dll from San Andreas Fixed PS2 zip into map folder.
Extract all .dat from GTA SA Mobile to PC - HUD Weapon Icons.rar into weapon folder.
Extract Colocopter.img, data and gta3.img folder from GTA San Andreas Fixed Vehicles.zip into vehicles folder.

If you want to have colorable military vehicles replace barracks.dat and hydras.dat of gta3.img with the ones of gta3imgcolorable military vehicles folder.
Delete Fixed Spectacular Values folder (its inside gta3.img folder)

Also, extract into gta3.img into vehicles folder the parachute.dat from Parachute animation fix.rar, and replace the camera.dat with the same from camera.zip, also replace the region.txt with the other one you downloaded and the 3 .dat from the Hiding Racers HD.rar

Now you have all mods, and fixes installed.
